## CoQ10 vs Ubiquinol

Co-enzyme Q10 (CoQ10) is an essential component in the body's energy production and supports physical stamina.

Ubiquinol is the active form of CoQ10, a more readily available form for the body to absorb and utilise. Ubiquinol also acts as an antioxidant, reducing free radicals formed in the body and supporting cardiovascular function.

If you're thinking that CoQ10 might be right for you look out for the active ubiquinol form.

TIPS**

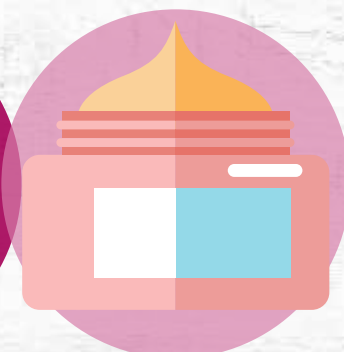

Wash your skin  
twice daily. Use  
a cleanser that is  
right for your skin  
(oily or sensitive)

Apply acne treatment  
to prevent and clear  
out clogged pores  
as directed.

Use oil free  
moisturiser to keep  
the skin hydrated.  
This will also help  
balance oil production.
